

The desktop layout

The same redesign adapted to wide screens — the **Trip Hub** becomes a two-column layout with a persistent right sidebar (the pack + invite always visible), and lists become grids. The **Wish · Vote · Go** spine still runs the show.

Trip Hub · Wish — two-column: main feed + persistent sidebar (pack + invite always visible)

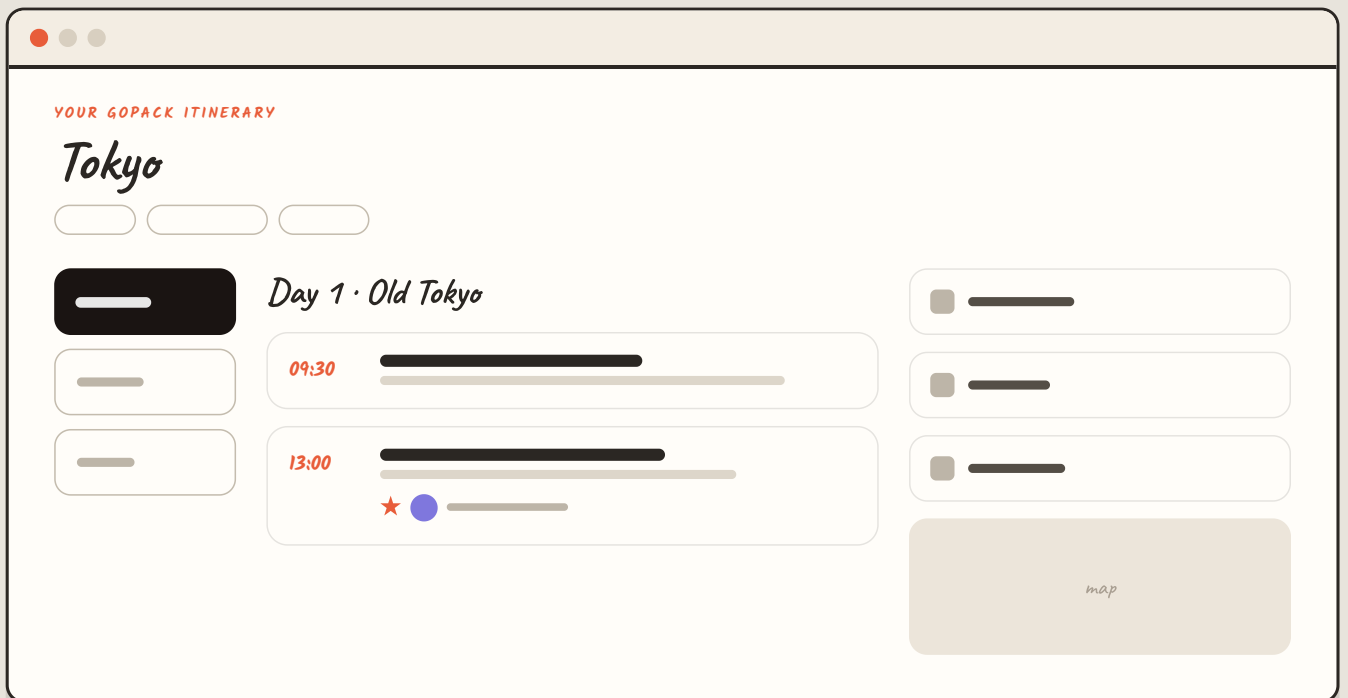

Trip Hub · Vote

Trip Hub · Go

Itinerary — day-rail left, timeline center, actions right

Note: the shipped code currently centers the mobile column on desktop. This board shows the fuller desktop layout I'd build next — say the word and I'll implement the two-column hub.
